

2024-2025 LWVMC Priorities

The National League of- Women Voters is recommending that the Campaign for Making Democracy Work continue for 2024-2025 and encourages Leagues at every level to continue to work to protect and advance voting rights and election reform at this critical time for democracy, as well as fight efforts in Washington, D.C. and state legislatures to suppress voting.

VOTER SERVICES PRIORITIES

The Priorities for LWVMC for 2024-2025 will serve these purposes. As a nonpartisan, grassroots, volunteer organization, we will work to protect and expand voting rights and ensure everyone is represented in our democracy. To achieve this, we will:

- Maintain a strong focus on our core voter services activities.
- Respond and act on LWVMI and LWVUS defending democracy action Alerts.
- Implement recommended LWVMI defending democracy projects and educational programs.

ENVIRONMENTAL PRIORITIES

The Environmental Committee's mission is to educate ourselves, the membership and the public about how individual and governmental practices impact the environment and to improve communications among those individuals, groups and entities. The LWVMC supports the LWVMI and the LWVUS efforts to promote environmental goals and advocacy by participating in the LWVMI Environmental Network and LWVUS Climate interest groups.

Our specific 2024-2025 priorities include:

- Hosting speakers, presentations, and tours of local facilities to bring awareness and information to our members
- Partnering with other nonpartisan groups to advance our environmental goals
- Studying and advocating for policies and legislation that impact our Environment

ORGANIZATIONAL DEVELOPMENT PRIORITY

An ongoing priority of the LWVMC Board of Directors will be:

- An annual (or more frequent) review of board positions and roles,
- Assessment of the existing board/leadership structure
- Evaluation of the leadership development, succession planning and project proposal processes.

Approved June 12, 2024
